The developing of the elements SD9286

SUERDA. gets its shape, its power and its magic from the concept of the elements where water meets solid material.

The principle of natural forces is embodied as a frozen snapshot in an everyday product that is anything but prosaic.

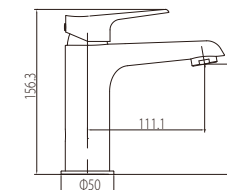

KOOCO

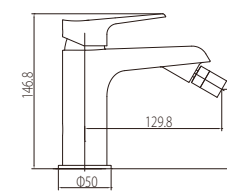

No matter it's simple and fluent, elegant and delicate, or pure and mellow, the shape of every faucet is produced with the unique idea of designers, making your bathroom more upscale and fashionable.

It amazes, polarises and challenges: both the people who understand it and the environments that are ready for it. It is something unique for individualists and the spaces that they create.

UNBURDENED STATE OF MIND
MORE COMFORTABLE EXPRESSION

Different from the hiding, but also different publicity,
After post-modern,
Dare to express self-cultivation directly,
It is also a comfortable state.

New Sanitary New Product
Design From Shark's

Shark series
The perfect integration
of function and
aesthetics

Firstly, the designer gets inspiration
from shark's streamlined body
and designs it with uniqueness
and ingenuity.

It appears a cruising,
elegant & powerful shark
under the sea.

Meanwhile, by the original design of modularization, users can choose panel with their decoration style. Both material and color can be freely combined with collocation.

Established in 1985.

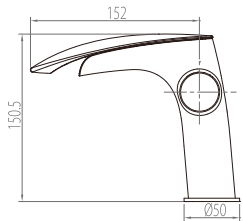

However, the biggest highlight is the application of originality of cold cartridge. It only allows the cold water in the middle position. The system does not turn on the heater unnecessarily in order to save energy and avoid scald. When users need to open hot water, they only need to turn the handle more.
